

## Masted Coil Cubing Unit

Suitable for deep horizontal or vertical wells, this process allows repeatable, selective isolation of downhole intervals for pinpoint stimulation.

### Equipment Specifications:

- Kenworth T800B
- 80K Pull Injector
- 60 Foot mast
- 2-7/8" Pipe
- 5" 10K Stripper
- Operating Cab in Sleeper  
7'x7'
- 1200m 2-7/8"
- 10k Dual combi BOPs
- Orion Data acquisition system
- Real time data uplink
- 2 – 5 man crews for 24 hour  
operations
- 600 Hp 10K Fluid Truck for  
p-testing Bops and  
Circulating
- Support Vehicle with  
Knuckle Picker

## High Volume N2 Pumping unit

Single high rate pumper allows for smaller footprint on location and less crew than with multiple smaller capacity units.

### Performance Specifications:

- Max Flow rate - 1900scm/min
- Max discharge pressure - 70mpa/10,000psi
- Heat source - Direct fired
- N2 Treating temperature – 0-250°C
- Queen trailer supplied - 50,000 scm
- Max width – 3.35m
- Max length (with tractor) - 20.7m
- Max Height – 4.6m
- Gross vehicle weight - 60,000kgs
