

Masted Coil Tubing Unit

Suitable for deep horizontal or vertical wells, this process allows repeatable, selective isolation of downhole intervals for pinpoint stimulation.

Equipment Specifications:

- Kenworth T800B
- 80K Pull Injector
- 60 Foot mast
- 50.8mm-73mm tubing capacity
- 5” 10K Stripper
- Operating Cab in Sleeper
- Orion Data acquisition system
- Real time data uplink
- 2 – 5 man crews for 24 hour operations

10K Fluid Pump

600Hp10K Fluid pump Suitable for p-testing Bops and Circulating CT to bottom

Equipment Specifications:

- 600 Hp SPM Pump
- Capable of 1.2m³/minute
- 2 blending tanks
- Chemical Injection Pump
- Climate controlled Operator Cabin
- Data Acquisition
- 40 meters of 2" 1502 Treatment iron
- Enclosed Three way manifold

CT Support Unit

Equipment Specifications:

- 20T Picker
- Riser skid package
- 2 X 10K BOPs
- Pressure Test Sub
- Fully Equipped Tool Box c/w dimple Sub, pull plate and
