

Discover the unparalleled expertise of Titanium Energy Services, a unique multi-services company with a wealth of experience in the oil & gas industry. Our pumping services division is growing its chemical injection services specializing in coiled tubing support and acidizing. Our growing fleet of chemical injection equipment is strategically stationed in our various locations to service across Western Canada.

Equipment Specs:

- 8x Changeable totes
- 3x Chemical Pumps (0.25L/min - 30L/min)
- 2x Chemical Pumps (0.25L/min - 41L/min)
- 1 High-Rate chemical pump (5L/min - 135L/min)
- Ability to pump well servicing fluids and chemicals
- Operator cab c/w full data acquisition

CHEMICAL INJECTION PUMPING SERVICES

Purpose

The purpose of the chemical injection trailer is to assist in pumping and coil tubing operations that require constant injection of chemicals into the fluid being pumped. The trailer also helps to ensure the proper amount of chemical is being pumped and to maximize the effect of the chemicals. With the trailer Titanium can carry a larger variety of chemicals to and from job sites.

Capacity

The Chemical Injection unit can carry 8x 1000L totes of a variety of chemicals that are related to coiled tubing operations. Totes can be changed depending on the type of job and customer requests.

Pumps

The trailer is equipped with three AMPCO 006 chemical injection pumps, each capable of pumping between 0.25L/min to 30L/min, along with two SPX-015 U2 chemical injection pumps, which can pump between 0.25L/min to 41L/min. Additionally, there is one high-rate chemical injection pump capable of pumping 5L/min to 135L/min. All pumps and hoses are pressure rated to 200PSi.
